* Retained high-level allocation while shifting to investments that would not duplicate IIP
** Expected returns calculated based on Mercer outlook
Pool balances will vary over the next year

• Initial modeling reflects the following projected beginning balances:
  • Short-term pool $50-100 Million
  • Intermediate pool $90-100 Million
  • Long-term pool $140 Million
• Above numbers determined using historical cash needs and factoring projected future needs
• Balances will likely fluctuate through the year
  • Access to funds in LTP and increased maximums will encourage higher participation levels
  • Continued scrubbing of historical balances should allow for less liquidity in STP
Now we can talk benchmarks
