The Public Opening for the proposals will be **March 6, 2018 at 2:00 PM** at the Business Services Center, Training Room 4202A

Additional changes to the Proposal information:

**ATTACHMENT B**

Addendum to Fire Alarm Scope

*Remove all Fire Alarm Audible and Visual devices from the walls as well as the Blue lensed devices used for emergency notifications. The holes in the walls need to be patched and painted to current colors and textures.*

*The new ECS devices will be non-descript White System Sensor devices allowing for all emergencies to be through these devices. The Strobes will flash on all emergencies and the*
speakers will play pre-recorded messages for the different emergencies specified by UNTS Fire Marshal and Facilities Fire Systems. The system needs to comply with current Intelligibility standards. All TAS/ADA rooms need to be upgraded to be comply with current standards for coverage for both hearing and visually impaired residents.

The Fire Alarm scope will also include changing out the existing sounder bases. The new bases will be low frequency sounder bases.

Included in the scope is the adding of a 160 character format LCD Annunciator compatible with the existing Notifier NFS2-3030.

As part of the Sprinkler scope of work, the exterior Waterflow A/V needs to be a red System Sensor horn strobe mounted above the FDC.

**Acknowledgement:** Please acknowledge receipt of this addenda by signing below and attaching this addenda to your bid.
