Policy Statement. The System Administration is committed to protecting the confidentiality, integrity, and availability of information and information resources. This policy supports security, business continuity, risk management, compliance with applicable laws and regulations, and maximizes the ability of the System Administration to meet its goals and objectives.

Application of Policy. All users of information and information resources of System Administration, including students, faculty, staff, guests, contractors, consultants, and vendors.

Definitions.

1. Business Continuity Planning. "Business Continuity Planning" means the process of identifying mission-critical information systems and business functions, analyzing the risks and probabilities of service disruptions and outages, and developing procedures to continue operations during outages and restore those systems and functions.

2. Category I Information. "Category I Information" means confidential information that must be protected from unauthorized disclosure or public release based on state or federal law (e.g. the Texas Public Information Act, and other constitutional, statutory, judicial, and legal agreement requirements).

3. Category II Information. "Category II Information" means sensitive information that could be subject to release under the Texas Public Information Act and should be controlled prior to release.

5. Incident. "Incident" means a security event that results in, or has the potential to result in a breach of the confidentiality, integrity, or availability of information or an information resource. Security incidents result from accidental or deliberate unauthorized access, loss, disclosure, modification, disruption, or modification of information resources or information.

6. Information. "Information" means data that the System Administration is responsible for generating, collecting, processing, accessing, disseminating, or disposing of in support of a business function.

7. Information Resources. "Information Resources" means the procedures, equipment, and software that are employed, designed, built, operated, and maintained to collect, record,
process, store, retrieve, display, and transmit information, and associated personnel including consultants and contractors.

8. Information Security. “Information Security” means the protection of information and information resources from threats in order to ensure business continuity, minimize business risks, and maximize the ability of the System Administration to meet its goals and objectives. Information security ensures the confidentiality, integrity and availability of information resources and information.

10. Information Security Program. “Information Security Program” means a collection of controls, policies, procedures, and best practices used to ensure the confidentiality, integrity, and availability of System Administration owned information resources and information.

11. Least Privilege. “Least Privilege” means the security principle that requires application of the most restrictive set of privileges needed for the performance of authorized tasks. The application of this principle limits the damage that can result from accident, error, or unauthorized use.

12. Mission Critical. “Mission Critical” means a function, service, or asset that is vital to the operation of System Administration which, if made unavailable, would result in considerable harm to the Institution and its ability to fulfill its responsibilities.

13. Organizational Unit. “Organizational Unit” means a department, division, center, office, or other sub-unit of the System Administration. Organizational units are identified on System Administration organizational chart, and have staff and budget allocations.

Procedures and Responsibilities.

1. Information Security Program and Controls

The System Administration is required to adopt and implement an information security program that is consistent with UNT System Regulation 06.1000. The processes, procedures, controls and standards established to meet the requirements of this policy shall adhere to the UNT System Information Security Handbook that is maintained by the UNT System Associate Vice Chancellor for Information Technology and incorporates 1 TAC §202, the information security management system framework established in ISO/IEC 27001 and ISO/IEC 27002, NIST SP 800-53, and other information protection standards as applicable. Information protection laws shall be considered in regard to use or access to information and information resources.
2. Information Security Roles

2.1. Executive Management

2.1.1. The Chancellor or his designee is responsible for overseeing the protection of information resources and for reviewing and approving the designation of information owners and their associated responsibilities.

2.1.2. The System Administration information security program shall comply with directives given by the UNT System Associate Vice Chancellor for Information Technology who shall be responsible for approval, oversight and coordination of the information security program throughout the UNT System.

Responsible Party: Chancellor; Information Security Officer, Information Owners; Custodians, Users

2.2. Information Security Officer

2.2.1. The Information Security Officer for System Administration is responsible for administration and management of the information security program and shall report to and comply with directives from the UNT System Associate Vice Chancellor for Information Technology.

Responsible Party: Information Security Officer

2.3. Functional Roles

2.3.1. Information owners have operational authority for specific information and are responsible for authorizing the controls for generation, collection, processing, access, dissemination and disposal of that information.

2.3.2. A custodian is the person responsible for implementing the information owner-defined controls and access to an information resource. Custodians are responsible for the operation of an information resource. Individuals who obtain, access, or use information provided by information owners for the purpose of performing tasks also act as custodians of the information and are responsible for maintaining the security of the information. Custodians may include employees, vendors, and any third party acting as an agent of, or otherwise on behalf of, the System Administration.
2.3.3. A user is an individual or automated application authorized to access an information resource in accordance with the information owner-defined controls and access rules.

2.3.4. Guests, contractors, consultants and vendors are considered external parties and shall adhere to this policy.

Responsible Party: Information Owners, Custodians; Users, External Parties

3. Secure Access and Management of Information and Information Resources

3.1. All individuals who hold information security roles are responsible for ensuring the confidentiality, integrity, and availability of information and information resources that they access or use.

Responsible Party: Users

3.2. Access to information and information resources shall be managed and controlled and shall be granted according to the principle of least privilege.

Responsible Party: Information Owners, Custodians

3.3. Information Owners and Custodians must ensure that access to information and information resources shall be granted to a user only after the user has acknowledged that he or she will comply with this policy and shall be removed upon termination of employment, employment status change or termination of a written agreement.

Responsible Parties: Information Owners, Custodians, Users

3.4. All users of information resources shall receive security awareness training that is based on their information security role.

Responsible Parties: Organizational Units, Users

3.5. In accordance with applicable laws, the UNT System Information Security Handbook, and this policy, information shall be classified by Information Owners as Category I, II, or III. Information Owners and Custodians shall ensure that management, use, and access to information shall be based on its classification.

Responsible Parties: Information Owners, Custodians
3.6. Information and information resources shall be protected in accordance with the
controls required under the UNT System Information Security Handbook and shall
be implemented to ensure their logical and physical protection during all phases
of their lifecycles.

  Responsible Parties: Information Owners, Custodians, Users

3.7. Risks to information resources shall be managed in accordance with the
requirements of the UNT System Information Security Handbook. The expense of
security safeguards shall be commensurate with the value of the information and
information resources being protected.

  Responsible Parties: Information Owners, Custodians, Information Security
  Officer; Users

4. Information Security Incident Management

4.1. The Information Security Officer is responsible for managing security incidents.

  Responsible Party: Information Security Officer

4.2. Security incidents shall be reported to the Information Security Officer and
investigated promptly. All users shall cooperate during incident investigations and
shall maintain the confidentiality of incidents and associated activities during all
phases of incident handling.

  Responsible Parties: Information Security Officer, Information Owners,
  Custodians, Users

5. Business Continuity Planning

  Business continuity and disaster recovery plans shall be created and maintained for
mission critical information resources in accordance with the requirements of the UNT

  Responsible Party: Custodians

6. Security Exceptions

  Exceptions to security controls may be issued by the Information Security Officer.

  Responsible Party: Information Security Officer
7. **Sanctions**

Penalties for violating this policy include, but are not limited to, the following: disciplinary action, access and usage loss, employment termination, criminal prosecution, civil litigation, and fines.

**Responsible Party:** Information Security Officer, Users, Supervisors, and others involved in the disciplinary process
