Addendum #1

Please note the following clarifications and additions are hereby made to the aforementioned RFCSP.

ANSWERS TO QUESTIONS:

1. Clarify the credentials of the Design Firm as referenced in the RFQ? Reason: Many fire protection companies do fire pump design all the time but are not credentialed as engineering or design firms.

   ANSWER: For this project we need to have a set of engineered stamped Drawings

2. Define the term General Contractor - Is the intended purpose to be in a traditional role one of your General Contractors? Example – Like a Vaughn or a Spaw Glass.

   ANSWER: Any contractor as the ability to be the General contractor of the project. Stating projects that the contractor has been the General Contractor can help.

   End of Addendum-
