Addendum #1

Please note the following clarifications and additions are hereby made to the aforementioned RFCSP.

**ANSWERS TO QUESTIONS**

1. Sheet 2.00, in the new vault locations, there is a note indicated new screen wall and gate, is this to be provided by contractor? If so, please provide product basis of design.

   Provide a chain link fence/gate with privacy slats. The gate needs to be lockable with a padlock and provide proper access for maintenance and replacement of equipment.

2. Will work be done during normal working hours?

   Yes

3. Please provide concrete pad details and concrete strength requirements, and necessary rebar at fountain equipment yard. See pavement section on L2.01 for concrete strength/reinforcement.

   The thickness is 4" for the pads. See L2.01 for strength/reinforcement.

4. Sheet L2.02, detail 2, indicates to view sheet L2.01 for reinforcing for the concrete subbase under the pavers. However detail 2 does not indicate the thickness or the strength of concrete. Is this information also to be provided on Sheet A2.01 detail "concrete pavement section"? If not, please provide thickness and strength requirements for the concrete.

   Concrete pavement section/L2.01 calls out strength and reinforcement. Detail 2/L2.02 is showing a 4” concrete base.

5. Sheet WF6.03, a note below the label FPB-1 calls for a feeder to be brought from "Panel H-G" in Willis library, and brought to FPB-1. Where is Panel H-G located in Willis Library? Will this require a new penetration through the exterior wall of Willis Library? If so, please provide detail for necessary penetration.

   This will require a new penetration done design build by the electrician installing the power line from the panel to the pumps. Panel H-G is located in the south eastern most mechanical room in Willis Library on the first floor. See image. Exhibit A
6. L3.00, please confirm that the meter and backflow preventer are new scopes, and to be provided by contractor, along with the 2" line.

   Yes, the meter, RPZ, and main are all new and part of this scope.

7. The proposal form in spec 004100 indicates "No Alternates at this time". However sheet WF1.00, and WF4.03 indicate alternates. Please clarify the number of alternates required in the bid form.

   Alternates shown on drawings are not part of this package and not required at this time.
