Please note the following clarifications are hereby made to the aforementioned RFQ.
Questions and Answers

1. Does UNT have an existing e-locking system
   Yes, it's a Vanderbilt system and it is only on exterior building doors

2. Do you want the new to integrate with the old?
   Would like for it to integrate, but we are open to hearing about other systems.

3. What version of the Vanderbilt system is it?
   Vanderbilt SMS Enterprise 6.1.0

4. Are the exterior doors on a schedule or are they card controlled always?
   They are on a schedule and we do not currently have the exterior doors on a card reader.

5. Where do the user credentials and access levels come from?
   These users/groups come from Microsoft Active Directory. We can work with some other platforms, but that one is preferred.

6. Do you have a program like Microsoft Project directory that has all this information?
   We do have lists of faculty and staff. We are unsure how we want allow access to the buildings and to who. Maintenance and police department will definitely have access.

7. Does Ad Astra already keep student rosters for each class?
   No

8. Is there an existing system in the classrooms?
   No, there is currently no locking system other than the manual locksets.

9. Do you have a layout or idea of where we are putting our systems? Are rooms already defined to hold the systems?
   Yes, all classrooms doors will need e-locking. We will provide a list of all of the classrooms as well as layouts of all spaces and number of doors. We will note the electrical rooms on each floor.

10. If you have two doors in one class room will both need access control?
    Yes, all entry/exit doors to the classroom.

11. Can we use wireless instead of hard wearing?
    Hardwire only, are not interested in wireless at this time.

12. Are you looking at replacing Vanderbilt or expanding it?
    Either. We will leave that up to you in your bid.

13. Are Vanderbilt and Astra connected?
    No they are not, we are not sure they have the ability to. We may need to get coding or find another solution from Ad Astra.

14. Can we quit Ad Astra?
    No.

15. Do you have video surveillance? Does it need to be integrated with access control?
    There isn’t any surveillance currently in the classrooms. But it the vendor’s system can integrate, we can always ask them if they only integrate with specific systems or if they have open/custom integrations.

16. What video system do you have?
    We have a few different type systems on campus.

17. Can we see every single door and closet?
    Yes, we are scheduling a multi-day walk-through on December 13th-15th.

18. Is there internet in every building?
    Yes, but it does not always work.

19. What is the need of a new e-locking system?
We need the ability to secure our classrooms on campus in case of an emergency and to secure our classroom assets.

20. Do you know if you have asbestos in your older buildings?
Yes, some of the buildings have asbestos. We will have every building tested.

21. Do you know the location of every closet that we will need for wiring?
We will note the locations on the plans provided.

22. Do you already have a command and control center, like a security operation center?
The PD does not have a command and control center for our current e-lock system. We only have the ability to lock every e-lock door with a button in dispatch.

23. Are we expanding to other campuses?
Right now we are focused on the main UNT campus which includes Frisco and Discovery Park. The other UNT System campuses are separate right now, but they may be interested in the future.

24. Do all doors have key systems?
Yes they do and we want to keep them. We will need to keep or match the existing cylinders.

25. Do you want electronic strikes?
Yes, we would prefer electric strikes rather than electric hardware.

- Attachment: 11-12-21 Pre Bid Sign in Sheet.
- Attachment: Classroom Drawings

- End of Addendum-

Marina Williams
