QUESTIONS
The fountain equipment for the library mall fountains were installed in underground vaults in 2005. The equipment serves three water features; a circle fountain, two rectangle fountains, and a waterfall feature. The vaults have flooded numerous times in the last few years from pipe leaks causing major damage. The maintenance and replacement of equipment has become unsustainable. This project will move the location of the fountain equipment to above ground adjacent to the neighboring Willis Library. All new equipment and necessary piping, and new electrical service is included in the scope.
