Getting started with the Concur app

Registration using Single Sign-On

Clients can use Single Sign-on for mobile login. By using SSO, users can log in to the mobile device using their regular, EUID login and password instead of having a separate one for the mobile device.

Instead of the login and mobile-only password (PIN), the Mobile Registration page provides a company code that users must enter on the Company Sign In screen on the mobile device (see below).

Sign-in for mobile devices

1. Open the Concur app. Tap SSO Company Code Sign In.

2. Enter SSO Company Code "JJRPN". Tap Next.

3. On Company Sign On screen, enter your UNT System EUID and password. Tap Sign In.

*Use the same login credentials you use for your MyUNT portal.
